The charts and maps provided by Johnson Outdoors Marine Electronics, Inc. (“JOME”) are available in Standard Definition (SD), High Definition (HD) and High Definition LakeMaster (HD-LM) formats. HD-LM maps are typically surveyed by JOME, while HD and SD maps are derived from a variety of sources. The distinction between SD and HD maps refers generally to the level of detail and resolution of the mapping data. Some bodies of water may appear in multiple formats due to varying data sources and processing methods.

These charts and maps are provided for general informational purposes only and JOME provides no warranty, express or implied, regarding their accuracy, completeness, reliability, or suitability for any particular purpose. Not all lakes or coasts are fully mapped, and some may be partially or entirely omitted due to limited data availability, environmental factors, or technical limitations.

Map content, boundaries, and formats are subject to change without notice. Where bodies of water span multiple counties, only one county may be listed for brevity.
