GETTING STARTED

IMPORTANT SAFETY INFORMATION

Paddling enables people of all ages and abilities to experience nature with unrivaled closeness and variety. Adventures range from brief outings to challenging treks, but even the simplest trip can quickly lead to danger if proper precautions are not taken.

SAFETY LABELING AND SIGNAL WORDS

WARNING and **CAUTION** are signal words used throughout this user manual to identify important safety and product information. It is important to recognize and understand the meaning of each signal word and its message before operation.

WARNING

Indicates a hazardous situation, that if not avoided, **could** result in death or serious injury.

CAUTION

Indicates a hazardous situation, that if not avoided, **could** result in minor or moderate injury.

NOTICE

Indicates important product information, that if not followed, **could** result in property damage.

GENERAL OPERATING SAFETY WARNINGS

Read all safety warnings, instructions, illustrations, and specifications provided before operation. Keep this manual in a safe place for future reference if necessary. Failure to do so could result in death or serious injury.

WARNING

You are responsible for the safe and prudent operation of your watercraft. You must avoid hazards to navigation and always maintain a permanent watch so you can respond to situations as they develop. You must always be prepared to regain manual control of your watercraft. Learn to operate your Old Town product in an area free from hazards and obstacles.

- Follow the manufacturer's recommendations and read owner's information package for the proper use of product.
- If additional outfitting is added to this craft, use manufacturer's approved materials only; do not impair entry or exit access.
- Always wear a nationally approved, appropriately rated, and sized personal flotation device (PFD).
- Check weather forecast before departing dock and heed all weather advisories. Dress for the water temperature. Weather conditions can change quickly, turning a warm afternoon's paddle into a challenge to remember. If you prepare to get wet, you'll stay warm whatever nature brings your way.
- Do not use alcohol or mind-altering drugs prior to using this product.

⚠ WARNING

- Be aware of appropriate river water levels, tidal changes, dangerous currents, and weather changes.
- Scout unfamiliar waters; portage where appropriate.
- Do not paddle in flood conditions.
- Always keep a proper lookout and safe distance from other vessels and hazards.
- Regularly check your equipment prior to each use for signs of wear or failure.
- Wear a helmet where appropriate.
- Obtain certified first aid and rescue training. Be sure to carry first aid and rescue equipment with you.
- Paddlesports can be very dangerous and physically demanding. We recommend getting paddlesport instruction from a licensed certified instructor. Do not exceed your paddling ability.
- Always check with local regulations for watercraft safety requirements in your area.
- Never paddle alone. Let people know where you plan to go and when you plan to return.

EQUIPMENT REQUIREMENTS AND RECOMMENDATIONS

The equipment necessary for paddling can vary according to the type of trip being taken. Some accessories you can't do without, like a paddle and PFD, while others may not be essential for every trip, but can play a large part in keeping you safe and making your trip more enjoyable.

SAFETY INSTRUCTIONS FOR STORAGE

CLEANING

- **HULL EXTERIOR:** Wash with mild soap and water. You can also use Murphy's Oil Soap. To beautify, use a vinyl protectant product such as Armor All®, 303 Products or Pledge. These are safe for use on any of our Polyethylene, Superlinear, Royalex® and Fiberglass canoes or kayaks.

NOTICE DO NOT wax your hull with automotive paste wax. The wax fills in any scratches or gouges, then dries to a white color, making the accumulated wear more apparent.

- **HULL INTERIOR:** Wash with mild soap and water.

CAUTION DO NOT use the vinyl protectants or automotive pastes, waxes, or furniture polishes on the interior, as the floor of your boat may become slippery. Using such products on the interior of the watercraft may result in minor or moderate injury.

WATERCRAFT STORAGE

- **CANOES:** We recommend storing canoes "upside-down" on the gunwales. This prevents distortion or flattening of the hull from storing it on flat ground or on its side.
- **KAYAKS:** Should be stored on their sides or standing on one end, if at all possible. If stored outdoors we recommend a kayak cockpit cover to prevent the possibility of water getting inside. Another option is to store the boat upside-down, preferably in slings or on cradle-type saw horses. This will keep the decks from becoming distorted.

NOTICE Follow the instructions below when storing your watercraft. Otherwise, product damage is likely to occur.

If you must store your canoe or kayak outside, tie it down, as strong winds can catch the underside, flip it, and cause damage.

Ultraviolet light from the sun may fade the color over time, store your boat out of the sun. If stored outside, do not cover with a tarp laid directly on the boat, as the heat of the sun will create an oven under the tarp that can damage, distort or discolor the hull. A tarp properly suspended above the boat will protect it from ultraviolet light. Be sure to leave sufficient space to allow for air circulation.
